

Please reject petition#04-160 as I feel it is a bias towards broadcasters that are trying to force you listen to their stations rather than the freedom of satellite radio. As a subscriber to the service I enjoy the weather and traffic reports without having to listen to needless minutes of ads.

Satellite radio is a subscription service much like cable television and I feel the Nat'l Assoc. of Broadcasters is infringing on My right of freedom of choice. I choose to pay for the service to have the reports that I want to hear when I want to hear them. Not to listen to ads that don't necessarily pertain to me.

As a professional Truck Driver I feel that this petition would interfere with my ability to avoid certain situations safely by not having the reports that I would need as I need them.
